MA.1.A.3 1. Klasse

NAME

SO FUNKTIONIERT ES

Du siehst zwei Würfel. Zähle die Augen von beiden zusammen und schreibe das Ergebnis in das Kästchen.

1

A visual addition problem. On the left, a rounded square box contains 3 black dots. To its right is a plus sign. Next is another rounded square box containing 4 black dots. To its right is an equals sign. Finally, on the far right, is a dashed rounded square box, intended for the student to draw the sum.

2

A visual equation showing two boxes, each containing 6 dots, followed by a plus sign, an equals sign, and an empty dashed box.

3

A visual addition problem. On the left, a rounded square box contains 6 black dots arranged in two columns of three. To its right is a plus sign. Next is another rounded square box containing 4 black dots arranged in a diamond pattern (top, bottom, left, right). To its right is an equals sign. Finally, on the far right, is a dashed rounded square box, intended for the student to draw the sum.

4

A visual addition problem. On the left, a rounded square box contains 6 black dots arranged in two columns of three. To its right is a plus sign (+). Next is another rounded square box containing 3 black dots arranged in a diagonal line from top-left to bottom-right. To its right is an equals sign (=). Finally, on the far right, is an empty rounded square box with a dashed border.

5

A visual equation showing two boxes of dots. The first box contains 4 dots (2 in the top row, 2 in the bottom row). This is followed by a plus sign (+). The second box contains 5 dots (3 in the top row, 2 in the bottom row). This is followed by an equals sign (=). The final part of the equation is a dashed box, representing the unknown result of the addition.

6

A visual math problem. It shows two boxes, each containing dots. The first box has 5 dots (4 in a square pattern and 1 in the center). The second box has 4 dots in a square pattern. These are followed by a plus sign and an equals sign, leading to a third box that is empty and has a dashed border.

7

A visual addition problem. On the left, a rounded square box contains 6 black dots arranged in two columns of three. To its right is a plus sign (+). Next is another rounded square box containing 4 black dots arranged in a diamond pattern (top, bottom, left, right). To its right is an equals sign (=). Finally, on the far right, is a dashed rounded square box, intended for the student to draw the sum.

8

A visual addition problem. On the left, there are two identical boxes, each containing five black dots arranged in a cross pattern (one in the center, four around it). These are followed by a plus sign (+). To the right of the plus sign is another identical box with five dots. This is followed by an equals sign (=). To the right of the equals sign is a dashed-line box, representing the result of the addition.

9

A visual equation showing two boxes of dots. The first box contains 6 dots (3 in the top row, 3 in the bottom row). The second box contains 4 dots (2 in the top row, 2 in the bottom row). These are followed by a plus sign, an equals sign, and a dashed box representing the unknown result.

10

A visual equation showing two boxes, each containing 6 dots, followed by a plus sign, an equals sign, and a dashed box.

11

A visual equation showing two boxes, each containing six dots, followed by a plus sign, then two boxes, each containing four dots, followed by an equals sign, and finally a dashed box.

12

A visual equation showing two boxes, each containing 6 dots, followed by a plus sign, then a box containing 4 dots, followed by an equals sign, and finally a dashed box.
