NAME

SO FUNKTIONIERT ES

Du siehst zwei Würfel. Zähle die Augen von beiden zusammen und schreibe das Ergebnis in das Kästchen.

1

A diagram illustrating the addition of two sets. On the left, there are two identical rounded rectangular boxes, each containing three black dots arranged in a triangular pattern. These two boxes are separated by a plus sign (+). To the right of the plus sign is an equals sign (=), followed by a dashed rectangular box, representing the result of the addition.

2

A visual equation showing a rounded square containing 6 dots, followed by a plus sign, then a rounded square containing 1 dot, followed by an equals sign, and finally a dashed rounded square.

3

A diagram illustrating the addition of two sets. On the left, a rounded rectangle contains three black dots. This is followed by a plus sign, then another rounded rectangle containing one black dot. This is followed by an equals sign, and finally a dashed rounded rectangle, representing the resulting set.

4

A visual equation showing a box with 1 dot plus a box with 5 dots equals a dashed box.

5

A visual equation showing a rounded square containing 6 dots, followed by a plus sign, then a rounded square containing 1 dot, followed by an equals sign, and finally a dashed rounded square.

6

A visual addition problem. On the left, there are two identical boxes, each containing five black dots arranged in a cross pattern (one in the center, four around it). These are followed by a plus sign (+). To the right of the plus sign is another identical box with five dots. This is followed by an equals sign (=). To the right of the equals sign is a dashed-line box, representing the unknown result of the addition.

7

A visual addition problem. On the left, a rounded square box contains 6 black dots arranged in two columns of three. To its right is a plus sign. Next is another rounded square box containing 4 black dots arranged in a diamond pattern (top, bottom, left, right). To its right is an equals sign. Finally, on the far right, is an empty dashed rounded square box, intended for the student to draw the sum.

8

A diagram illustrating a mathematical operation. It consists of two identical boxes, each containing two black dots. These are followed by a plus sign, an equals sign, and a dashed rectangular box, suggesting a sum or combination.

9

A visual equation showing two boxes, each containing 6 dots, followed by a plus sign, an equals sign, and a dashed box.

10

A diagram illustrating the addition of two identical boxes, each containing two black dots, resulting in an empty dashed box.

11

A visual equation showing a box with 1 dot plus a box with 6 dots equals a dashed box.
